NUTS & BOLTS

OF OWNING YOUR OWN TURNKEY WEBSITE BUSINESS

When you purchase a website business from www.abcdesignstudio.com, you are getting more than just a website template...

You are getting an actual revenue-producing website business.

Unlike purchasing a franchise or another type of business, you will be the sole owner of your website. This means that YOU are the only person who will be able to generate revenue on your website. YOU are the only person who will own the domain name of the website at the time that the domain name becomes transferred over to you, and YOU will have access to your website files on the server should you wish to modify your website files at any time.

Your website business will work for you 24 hours a day, 7 days a week and you will never need to worry about website maintenance, updating content, changing inventory, dealing with customers, or doing any type of website maintenance for your website when you purchase your website business from us. There is a unique associate tracking ID integrated within the HTML code on your website that does this hard-work work for you. This tracking ID allows you to generate commission earnings from reputable top-paying affiliate partners such as Amazon, Google AdSense, Commission Junction, Paid On Results, and Clickbank. These are just a few of the professional affiliate programs that we have built into the websites that we sell.

How Can A Website Business Make Money Without Any Maintenance? This Sounds Too Good To Be True...

The website businesses that we specialize in are known as Affiliate Website Businesses. These types of website businesses are actually the most profitable of any type of website business that you can own!

NUTS & BOLTS

OF OWNING YOUR OWN TURNKEY WEBSITE BUSINESS

Affiliate Website Businesses utilize revenue earnings from Google AdSense, Amazon, and other corporate giants that pay out billions in commissions to their affiliates every month. There is a tremendous amount of money made with owning this type of website. The reason is because when owning this type of website you are not “competing against” the corporate giants, but instead you are “working with” them. When their products or services are sold through your website, these corporate giants pay you a generous commission.

There is a tracking ID within your website’s HTML code that links to a complex database system for affiliate partners, which allows the business owner to generate money instantly for clicks and sales that occur on the website.

There are virtually no overhead costs with owning this type of website and there is literally no risk either. Unlike owning another type of website business such as a dropship website business or a service-based website business, the Affiliate-Based Website Business is the **ONLY** business that is considered maintenance-free and still makes money!

Why Affiliate Website Businesses Are So Successful

One of the biggest reasons why Affiliate Website Businesses are so successful is because your website works in conjunction “with” an already established product brand rather than working in “competition against” an already established product or brand.

When your customers visit your website, they will see that you are affiliated with Amazon or another recognized company. This makes your website more favorable for both your customers and the internet search engines. The benefit is that you have all the credibility that the large corporate website

businesses have established, and yet you don't have the high-cost of trying to "brand your own business through expensive advertising". Your website is already a welcome addition to the world-wide-web if you own an Affiliate-Based Website. All you need to do is just drive traffic to your website and your revenue earnings will happen for you automatically.

The other reason that Affiliate-Based Websites are so successful is because of the automation that they provide. For example, if your website business links to Amazon's storefront, then all the inventory updates, pricing, and customer fulfillment is handled by Amazon. You do not need to worry about maintaining products or inventory on your website since this happens automatically for you.

If you own a non-affiliate website, then you have the high cost of paying for your own shopping cart and merchant account, not to mention the day to day maintenance that is required to keep your website's inventory updated. You would need to know HTML coding in order to keep a website like this updated. But this is not the case when you own an Affiliate Website Business from [ABC Design Studio](http://ABCDesignStudio.com).

There is also NO overhead costs when owning an Affiliate Website Business, so your profit margin is much greater compared to owning any other type of website. For example, if the affiliate advertiser on your website pays 25% commission on every sale that generates from your website, then you will earn that exact amount without any fees or costs deducted. This is why so many people own affiliate website businesses, because they have demonstrated that they are the most profitable above all others.

How This Works

Your website generates revenue for you because it links to multiple affiliate partners. In other words, the customers to your website will click on a banner advertisement or on a product that they wish to buy. The customer will then be taken to checkout at the affiliate partner's website such as through Amazon.com. Your customer will leave your website, but your affiliate ID

a better choice.

code is integrated within your website's HTML code which is how you will receive earnings for your website's sales. Most of the affiliate partners even offer a 30-day cookie tracking system, which means that even if your customer leaves your website and then later goes to make a purchase directly from your affiliate partner's website within 30 days after visiting your website, you will still earn the commission on that sale!

The websites we sell are linked to the highest-rated and highest-paying affiliate programmers in the industry. We have taken time to research this to ensure the best success for our clients.

After your affiliate accounts have been setup and we have completed the HTML edits within your website's code to link to your affiliate partner accounts, you will be able to log into your affiliate partner accounts at any time to view your visitor clicks, sales, and commission earnings.

You will have your own unique usernames and passwords that you will setup when you register with the affiliates so you will be able to track your earnings and overall customer activity on your website.

What If I Don't Have Any Experience Owning A Website? How Will I Know What To Do?

If you are like 90% of our customers, you have probably never owned a website business before. No worries though, because when you purchase a website business from us, you can rely on our team of experts to ensure that owning your new website business will be a smooth and easy transition for you.

[ABC Design Studio](#) consists of a team of website developers and designers and customer service staff. We take care of all of the affiliate link integration for your website, so your website will be properly setup to generate revenue for you! There is no experience necessary in order for your website to be successful.

What Happens Next...

After you purchase your website, we will send you an email with your cPanel (control panel) access to the server where your website files are located. This allows you to monitor your website's visitor traffic and have access to your website files should you need this.

Within that same email, you will also receive step-by-step instructions about how to register with the affiliate partners that link from your website.

It is easy and **FREE** to register with your affiliate partners. You will simply setup an account with them through the links we send you in our email. You will just need to provide them with your name, address, phone (contact information), the URL (name of your website), how you intend to market and promote your website, and how you wish to be paid for your sales commissions. You will be able to elect if you want to be paid by check or direct deposit.

Then, we take care of the HTML affiliate link integration for you so your website will be all ready for you to start generating revenue within just a couple of days!
